

Hospitalist and Family Practice Model Evaluation

Executive Sponsor: Sharon Macdonald/Mike Moffat

Project Sponsor: Larry Reynolds/Dan Roberts

Program/Dept: Family Medicine and Medicine

Project Manager: Christa Ferreira

Start Date: January 2005

Finish Date: October 2005

Over the last number of years, different models for medical coverage of inpatients on Family Medicine and Medicine units at community hospitals have evolved. With the most recent agreement regarding medical coverage at Seven Oaks serving as the trigger, MB Health has requested that a full evaluation be conducted on the different models in use. The goal of the project is to complete that evaluation. At the request of the Family Medicine program, Dr. Moffat is leading the evaluation and has structured a working group which has met 3-4 times to review the models currently in place and to discuss the structure, process, and outcome measurements. A literature review has been completed on models of In-Hospital Medical Care.
