

## **IV Infusion Pump Replacement**

**Executive Sponsor:** Jan Currie

**Project Sponsor:** Betty Lou Rock

**Program/Dept:** Region

**Project Manager:** Frank Krupka

**Start Date:** April 2005

**Finish Date:** Phase 1 - November 2005  
Phase 2 - October 2006

In keeping with the WRHA's commitment to Patient Safety, funding was obtained to replace existing volumetric pumps containing newer technology infusion pumps with programmable patient safety features. These pumps have already been purchased for all sites except St. Boniface where replacement with newer technology has already occurred. The goal of this project is to implement the replacement of all existing pumps with new infusion pumps, to oversee regional standardization of medication protocols drug libraries and monographs to be used with infusion pumps and to facilitate and coordinate education and training to all staff using the new infusion pumps.
